SJR, IPP, and SNIP
SJR = SCImago Journal Rank is weighted by the prestige of a journal. Subject field, quality, and reputation of the journal have a direct effect on the value of a citation. SJR also normalizes for differences in citation behavior between subject fields.
IPP = Impact per Publication (IPP) measures the ratio of citations per article published in the journal.
SNIP = Source Normalized Impact per Paper measures contextual citation impact by weighting citations based on the total number of citations in a subject field.
